

NSFS poster at IRPA-14 in South Africa

At the international IRPA conference in South Africa in May 2016, NSFS presented its history and work in a [poster](#).

This was part of the celebration of IRPA's 50th Anniversary, where all Associate Societies had been given the opportunity to present themselves to share their experiences and challenges and to facilitate cooperation and communication.

Introduction

The North Society for Radiation Protection was established in 1964 at the initiative of guidance staff in Sweden. It arranged the first meeting, which included present advice in radiation protection in terms of the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden). Already in the same year the society became a member of IRPA (the International Radiation Protection Association) the first general meeting took place in Gothenburg in 1968. NSFS is a viable society, which has been able to arrange regular meetings for over 50 years.

Good practices

The four Nordic countries all regularly host a wide range of activities and courses for students and professionals working in them. In each country there are voluntary groups that have a possibility to visit and learn under the NSFS. Each country would be successful to carry out multidisciplinary networking and conferences, but the NSFS has been able to provide a forum for this.

The project for translating of the Swedish 'Strålnings- och skyddsutrustning' into English has been carried out successfully. This massive work consisted of four books:

- Part 1. Radiation Dos: The book before World War II, 314 pages
- Part 2. The Shield of Denmark: The NSFS, 364 pages
- Part 3. The Labour of Hercules 1940 - 1950, 170 pages
- Part 4. The Fall of Sweden: 1947 - 1950, 354 pages

Challenges

The NSFS has been using a web page for delivering information. Nevertheless and potential members could have using social media. Improving communication should be one of the priorities to activate members of the society to enhance opportunities for networking.

The society is not well known among professionals using radiation in medicine. During the next four years for society it will be introduced in Nordic and national professional societies on the field of medical use of radiation.

Contact details

The board of the NSFS in 2016-2018:
Björn By, president of the NSFS, bjorn@nordisk.org
Birgitta Johansson, secretary of the NSFS, bjorn@nordisk.org
Torbjörn Tostmann, treasurer of the NSFS, tostmann@nordisk.org

Deceased: Inger Holm, Inge Björkqvist, Hansson and Hansson, S. W. Johansson, Eriksson, Torbjörn Johansson, Mikko Kallioinen and Bengt Bengt Eriksson, Mikko Kallioinen, Mikko Kallioinen and Mikko Kallioinen, Mikko Kallioinen and Mikko Kallioinen, Mikko Kallioinen and Mikko Kallioinen, Mikko Kallioinen and Mikko Kallioinen.
